

AIRLIFT

KESTREL Door mount

Airlift as can offer Eurocopter 350 fitted with KESTREL door mount.

The Kestrel door mount is manually operated by the photographer.

It provides free movement in all three axis. (Pan, Tilt and Roll)

The Kestrel mount can be fitted with a passive gyro stabilized system, (Gyro assistance) which gives possibility of greater focal lengths and smoother shoots.

The Kestrel door mount can carry any cameras up to ? kgs.

The Kestrel door mount can be fitted to either side of the helicopter.

The Kestrel door mount is the more versatile of the range of helicopter mounts, and is suitable for almost any shoot.
